## Washcloth

# K-Supply

Komori K-Washcloth is one of the latest additions to the K-Supply product portfolio, providing a perfect solution for highly efficient washing programs. After an extensive R&D process in the European Komori Graphic Center, K-Washcloth was carefully selected and developed exclusively for Komori presses. The synergy between Komori's expertise and the use of high quality technology is resulting in a solid and proven product, suitable for even the most demanding quick washing programs.

The Komori K-WASHCLOTH is made from highly absorbent material and PET which is joint together through a laminating spun laced process. K-Washcloth is pre-saturated with an excellent washing solvent which clean the blanket perfectly. The consistency and quality of our new washcloth gives a superior result on press, reduces wash-time and optimize the total production time.

Today, K-Washcloth is not only the standard in our Komori Graphic Center, but widely used by Komori printers all over Europe.

### **Directions for Use:**

For details, please refer to the safety data sheet.
